BRidging Information and Data Generation for Evidence-based Health Policy and Research

Herman Van Oyen

From the pre-kick-off meeting, Luxemburg 29 Jan 2015

Meeting of WP8-Task 1
Rome 25 June 2015

To create a European health information (EU-HI) and data generation networks covering major EU health policy areas.

To work towards:

- ❖ comprehensive, integrated and sustainable EU-HI
- ❖ supporting evidence-based health policy and research for the EU and Member States
- ❖ providing blueprints and/or concepts of building blocks for a future EU-HI research infrastructure consortium (ERIC-HI)

BRIDGEHEALTH
BRidging Information and Data Generation
for Evidence-based Health Policy and Research

European
Commission

- To enhance the transferability of health information and data for policy and improve the utility and use of data and indicators for stakeholders in policy making, public health surveillance and health care

- To reduce health information inequality within the EU and within MSs

BRIDGEHEALTH
BRidging Information and Data Generation
for Evidence-based Health Policy and Research

European Commission

Specific aims

To develop a blueprint for a sustainable and integrated EU Health information system by developing common methods:

- standardizing the collection and exchange of health information, within and between domains, between MSs

- ensuring data quality, including procedures for internal and external validation of health indicators

BRIDGEHEALTH
BRidging Information and Data Generation
for Evidence-based Health Policy and Research

European Commission

Specific aims

To develop a blueprint for a sustainable and integrated EU Health information system by developing common methods:

- undertaking priority setting exercises for health information

- addressing ethical and legal issues associated with the collection and use of health data within MSs and the EU

Coordination, dialogue and interaction with DG-SANTE', the Expert group on Health Information, Eurostat, DG Research and other DG ensure the sustainability of the work and bridges to a future ERIC-HI

WP	WP Title	Beneficiary
WP1	Coordination of the project	WIP-ISP
WP2	Dissemination of the project	INSERM
WP3	Evaluation of the project	WIP-ISP
