This project is funded by
the Health Programme of
the European Union

BRIDGE Health Project

... working towards a **European health information and data generation network** covering major European health policy areas

WP8 - Platform for population based registries - task 1 (population health)

Aims at:

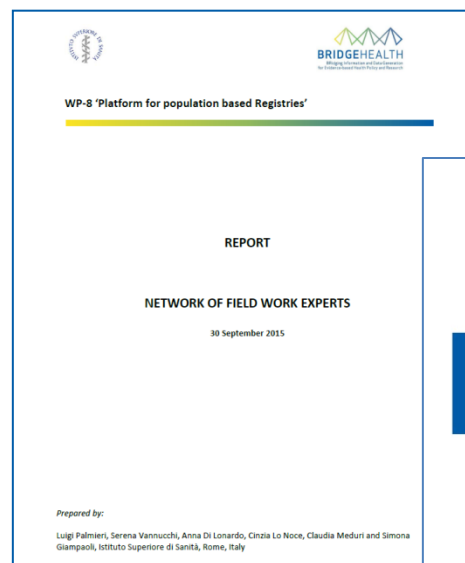

- Gathering and harmonizing procedures/methods and best practices
- Improving standardization and quality of data collection
- Facilitating implementation, sustainability and maintenance (step-wise procedure)
- Providing **community health indicators of disease occurrence**

Deliverables:

- Consolidation of the network of experts
- Manuals of operations
- Guidelines for training

WP8 - Platform for population based registries - task 1 - Process indicators

- Updating and maintaining the collaborative network of field work experts and key persons involved in surveillance of NCD
- Interactive communication with research groups dealing with surveillance of NCD for development of manual of operations of population based registries and for training personnel
- Synergies with BRIDGE Health partners involved in population health (meeting 14.9.2017)
